

0.1 Generation Z

Phrasal verbs · Present simple and present continuous

Baby boomers – the generation born between the early to mid-1940s to the mid-1960s, i.e. the period after World War II when many people began increasing their families. They are confident and believe in the importance of social rules. Baby boomers are wealthier than their parents, so they enjoy spending money on food, clothes and holidays. Only about 40 to 50 percent use their smartphones to buy products online; however, over 80 percent belong to at least one social media site.

Generation X – people born between the 1960s and the early 1980s. They are comfortable with digital tools and value a balance between work and leisure and like to spend time with their families. Many of them still read newspapers and magazines, listen to the radio and watch TV. They are sophisticated, self-reliant, independent thinkers and tolerant of different lifestyles.

Generation Y or **Millennials** – those born between 1982 and 2000, who grew up with technology. This is a generation that can't really imagine a world without the Internet or mobile phones. They are open-minded and not afraid to question authority. A recent survey said they are more materialistic than other generations and less concerned with helping the community than Generation X.

- 1 **SPEAK** Describe the photos. How are people of your generation different to older generations? Think about:

- communication
- using technology
- work
- money
- free time
- family

- 2 **Write** Complete the sentences with the verbs from the box.

Extra classroom activities

- As a warm-up, ask students to describe one of their classmates, using the present simple and present continuous, and the others have to guess who it is. Do an open-class model for the students, e.g. *He's sitting near the window and looking at his book. He always wears jeans and he likes football.*

- For exercise 8, take notes of the mistakes students make during the speaking activity. Then write the errors on the board and ask students to correct them.

Online teaching

- Do exercise 3 in breakout rooms.
- For exercise 4, you may play the recording and ask students to say in their own words what they remember.

4 Isabel is coming to visit Jess in *October*.
5 Evie *has been working* as a(n) *history teacher* since September.
6 Daniel *has never been* to *Rome* before.

- 5 **Study** the grammar table and complete it with present perfect simple, present perfect continuous, *never*, *ever* and *lately*.

Key Grammar

We use the ¹ *present perfect continuous*:

- to talk about events or activities that started in the past and that are continuing now,
- to emphasise the duration of an activity,
- to talk about repeated actions in the near unspecified past, often with *recently* or ² *lately*,
- for actions that have just finished when we can see their effects or consequences.

We use the ³ *present perfect simple* to talk about:

- actions or situations that started in the past and haven't finished, or that have a visible result,
- experiences at an unstated time in the past. We often use ⁴ *ever* in questions about these experiences.

We use ⁵ *never* with the present perfect simple to mean 'at no time in the past'.

Present perfect simple

+	She's <i>started</i> working in a school.
–	I <i>haven't been</i> to Rome.
?	<i>Have</i> you ever <i>ordered</i> something online? Yes, I <i>have</i> . / No, I <i>haven't</i> .
Wh- ?	Which book <i>have</i> they <i>bought</i> ?

Present perfect continuous

+	I've <i>been applying</i> for jobs.
–	Sam <i>hasn't been doing</i> much for the last three weeks.
?	<i>Have</i> they <i>been arguing</i> again? Yes, they <i>have</i> . / No, they <i>haven't</i> .
Wh- ?	Why <i>have</i> you <i>been avoiding</i> me recently?

B bag break holiday house light places sightseeing some trekking

holiday

vacation

backpacking holiday, city break, do some trekking, go sightseeing, guest house, must-see places, pack light, sleeping bag
related to a staycation: go sightseeing, must-see places

6 UNIT 1

- 2 Read the text. Which of the five ideas for a staycation appeals to you the most?

1 DISCOVER YOUR OWN CITY You've seen the sights of London and Paris, and last year you **soaked up the atmosphere** in Rome. Now take some time to **wander around** your own city and **discover its tourist attractions** for yourself.

2 GET A PART-TIME JOB While most young people are **visiting popular resorts** with their families, **hunting for souvenirs** or **spending vast sums** on eating out, summer's a great time to get a job in a shop or café and earn some money.

3 EXPLORE BY BIKE Are you tired of struggling with public transport? You've tried **getting around on foot**, but it takes forever? Why not **rent a bike**? It's easily the best way to get to different places.

4 VISIT A THEME PARK **Going to a local theme park** is a great way to **get your adrenaline pumping**. It really doesn't matter if you **run into** people you already know. You can hang out together!

5 LEARN A NEW SKILL Have you ever dreamed of going scuba diving, but the cost **doesn't fit your budget**? Check your local swimming pool, where you might be able to learn for half the price!

- 3 **KEY WORDS** Match some of the highlighted phrases from exercise 2 to definitions 1–8.

- looking for something to take home to remind you of your holiday *hunting for souvenirs*
- meet by accident *run into*
- make your heart beat faster and give you more energy *get your adrenaline pumping*
- get a real feel for a place *soak up the atmosphere*
- going to places where lots of people spend their holidays *visiting popular resorts*
- paying lots of money *spending vast sums*
- walk without a fixed destination *wander around*
- costs more money than you have *doesn't fit your budget*

The main reason why people decide to do so is that ² most of / the majority of those who undergo such an experience get better jobs in a relatively shorter time. There is a whole array of activities you may do. One boy, for example, attended ³ Italian classes/ lessons in Italy, and a girl taught English in Thailand for ⁴ six months. One more testimonial comes from a boy who was able to help others by doing ⁵ volunteer work / repair works somewhere in South Africa.

- 6 **KEY WORDS** Read the **WATCH OUT | SKILLS** box and match the highlighted words and phrases from the text to definitions 1–8.

- get more opportunities and choices *broaden your horizons*
- get more abilities *gain skills*
- a situation or a place in which you feel relaxed *comfort zone*
- putting someone's name on the official list of participants *enrolling*
- tested someone's skills and abilities *challenged*
- make stronger *strengthen*
- do something risky *venture out*
- improving *enriching*

WATCH OUT | SKILLS

Guessing the meaning of words

If you don't know what a word means, use the context to help you guess the meaning:

- Identify what part of speech the word is by looking at the words before and after it.
- Look at the rest of the sentence and paragraph for clues, and try to think of synonyms for the word.

- 7 Complete the sentences with the correct forms of the words and phrases from exercise 6.

- Volunteering for Greenpeace in the summer was not only a(n) enriching experience, but it also strengthened my CV.
- After not being challenged enough in my computer studies classes, I enrolled in an extra IT course.
- If you'd like to be pushed out of your comfort zone and venture out across Asia with me, get in touch!
- After a year on a cruise ship, Marcus gained a lot of new skills and broadened his horizons.

- 8 Answer the questions.

- Which of the trips presented in the article would be the most suitable for you? Why?
- What potential problems might people who travel this way experience?
- What piece of advice might Harvey, Ethan and Clare give to those who plan similar journeys?

FAST FINISHERS

Imagine you could travel abroad and work anywhere you can dream of. What would you do? Think about the place, the kind of job and the potential benefits.

Find a website that offers study or work programmes in different countries.

- What type of programmes do they offer?
- Which programme do you think is the most interesting?

10 UNIT 1

Extra classroom activities

- As a warm-up, ask students to imagine they are going to take a gap year (i.e. a year off after graduating, taken by students to travel before they take up a job or further their academic degree), but they need to save up for it. Put them in pairs to discuss ways they can save money before they go and how they will cover expenses while they are on their gap year. Pairs present their ideas to the class.

- Before students do exercise 4, tell them to read the text and summarise each paragraph in their own words.

Online teaching

- Before exercise 1, use an online poll tool (e.g. Mentimeter or AnswerGarden) and tell students to write one word they associate with travelling. Then display the word cloud on the screen and discuss the results.

- For exercise 8, put students into breakout rooms and then they report their ideas to the class.

TRAVEL ABROAD, DISCOVER MORE

A There is no doubt that travelling overseas can be an **enriching** experience. First, you get to travel, **broaden your horizons** and experience other cultures or learn various languages. A programme that gives you the chance to study or work abroad helps you to gain independence and learn new things while getting more experience in a totally different environment. This will **strengthen** your CV and, as many students find, could help you to launch your
 5 future professional career. Ninety-seven percent of students who study abroad find a job within twelve months of graduating, and eighty-five percent of them agree that the experience helped them **gain skills** for the job market*. But don't just take our word for it – read these statements from former participants.

B

Harvey, studied abroad in Italy.

I'd always dreamed of going to Italy, but I was determined to avoid the really
 10 touristy destinations, so I ended up in Pavia for a year. Being part of a small
 group of foreign students I'd never met before encouraged me to go out and
 explore on my own. It pushed me out of my **comfort zone**, and I was constantly
 being **challenged**. I was forced to make my own decisions and to find out things
 for myself. I used to **venture out** alone and quickly made friends with several
 15 local students. I've done my best to keep in touch with them since I came back
 home. The language classes in particular were hard work, but I've realised now
 that it's all paid off. I was watching a film in Italian recently, and I could follow it
 all without subtitles!

C

Clare, taught English in Thailand.

I searched online and I discovered I could put my language studies
 to good use by **enrolling** in an English-teaching programme. I started
 20 by getting the teaching qualification which the programme offered. It was
 an amazing opportunity to learn a new skill while making use of the stuff
 I was studying at uni. Then I spent six months in a town near Bangkok.
 The contact with the locals was unforgettable, but what I enjoyed most
 was travelling around. I made the most of every chance the programme
 25 offered to go and see new places.

D

Ethan, volunteered on a building project in South Africa.

Last summer, I spent a month working on a housing project in a remote South
 African community. My idea was to experience a really different country and
 to help people. I quickly realised how incredibly blessed I was to have this
 opportunity to travel there and to see how willing people can make a huge
 30 difference to other people's communities. My time was mostly taken up with
 repairing the fences around the school to keep animals out, and we also did
 some jobs around the village, like painting and refurbishing houses. My most
 memorable experience was seeing wild animals I'd only ever seen on TV –
 I even got to play with elephants!

- 1 **SPEAK** What is the worst thing that has ever happened to you on holiday?

- 2  Match the words from box A to the words from box B to make phrases. Have you experienced any of these problems? Which of them would be the worst to happen on holiday?

A car crowded heavy lost plaster upset

B accident beach cast stomach ticket traffic

car accident, crowded beach, heavy traffic, lost ticket, plaster cast, upset stomach

- 3 Read the texts about travel accidents and answer the questions.

- Which of the accidents and emergencies was the most problematic?
- What would you do in these situations?

A Whenever I go on holiday, I **take out travel insurance** in order to be prepared for any **emergency**. But three years ago I learnt, quite painfully, that it's impossible to foresee all of the **travel mishaps** that may happen. We were on a boat trip, soaking up the sun and having fun. I had all my documents and money in a small bag around my neck. Well, I leaned overboard a bit too much and ... splash! I watched my credit cards, cash and, what is worse, my passport sink out of sight ... I've never **lost** so many **valuable items** at once. It took me a whole week to deal with it – instead of relaxing, I was stressed out half of my holiday.

B I don't usually **risk safety for** good photographs, but that place was different. We were in a national park, and the view was incredible. So I climbed up a small tree to get my perfect photo. I suddenly heard a loud cracking sound and the branch I was sitting on broke. I fell down and got quite badly injured. One of the hikers who saw it had a **first aid kit** with him, and he treated my wounds. Since then, I've always taken a basic medical set with me: two elastic bandages, **antiseptic wipes**, a **tick remover tool** and some allergy medicine, just in case.

C My best friend and I went to Thailand and Laos for a month. We thought we were well prepared for the trip – we got **vaccinated** against certain diseases, we took some **mosquito repellent** and packed the first aid kit pretty well. But on the first day in Bangkok, we ordered some water in the restaurant which wasn't bottled, and we ended up with major **food poisoning**. I had **diarrhoea** for three days and **came out in a** strange **rash**, and my friend was **vomiting** all the time. It was horrible – we even had to change our travel arrangements.

- 4 **KEY WORDS**  Match some of the highlighted words and phrases from exercise 3 to definitions 1–7.

- a substance that keeps certain kinds of insects away **mosquito repellent**
- an illness in which you pass waste from your body too often **diarrhoea**
- pay money to get coverage for risks connected with travelling **take out travel insurance**
- a device used to pull out a kind of insect that is stuck in the skin **tick remover tool**
- became covered in small red spots on the skin as a result of illness or allergy **came out in a rash**
- minor accidents on holiday **travel mishaps**
- a small box with some basic things you might need to treat someone's injuries or illness **first aid kit**

- 5 **KEY WORDS**  Complete the sentences with some of the highlighted words and phrases from exercise 3.

- Were you **vaccinated** against yellow fever before travelling to Asia?
- The most **valuable** item I've lost while on holiday was my wedding ring.
- I was extremely seasick, and I was **vomiting** during the entire voyage.
- You need to carry a medical kit in case of **emergency**.
- I honestly think that risking your **safety for** a perfect selfie is insane!
- I had to stay in my hotel room due to the **food poisoning/diarrhoea** I had after dinner.
- During the pandemic, I got used to carrying **antiseptic wipes** to clean my hands regularly.

- 6  **1.08**  Listen to four people calling their friends who had problems on holiday. Match texts A–C from exercise 3 to voice messages 1–4. One text matches two messages.

1 C 2 A 3 B 4 A

- 7  **1.09**  Which letter is silent in the words from the box? Listen, check and repeat.
The silent letter is 'h'.

diarrhoea exhausted exhibition ghost heir
honest vehicle

- 8 **SPEAK** Read the instructions and do the task. Student A, look at page 157. Student B, look at page 160.

FAST FINISHERS

-  Write five sentences about a nightmare holiday you have had.

12 UNIT 1

Extra classroom activity

After exercise 2, play the 'Would you rather' game. Ask students the following questions: *On holiday would you rather:*

- lose a ticket or have an upset stomach?
- have a car accident or a plaster cast?
- be on a crowded beach or in heavy traffic?

Online teaching

- For exercise 8, put pairs of students into breakout rooms. Then ask one pair to do the task for the whole class.
- Assign exercise 7 as recorded homework.

- 6 You look exhausted – a short holiday will **do you good**. *a*

- a benefit
- b change something so it becomes something else
- c invent, e.g. an explanation or a lie
- d see, hear or understand something with difficulty
- e get rid of or replace something
- f repair, paint and decorate, e.g. a house or room

4 SPEAK Describe the photos. How are the people in each photo risking their health or safety? What could happen to them?

5 **1.10** Listen to a radio phone-in about holiday experiences and complete the table. *Possible answers*

Name	Destination	Activity
Rosie	¹ <u>Costa Rica</u>	zip-lining
Oscar	² <u>Mexico (City)</u>	³ <u>sightseeing / going on guided tours / visiting famous buildings</u>
Jim	Philadelphia, USA	⁴ <u>playing football / taking part in a (youth) football tournament</u>
Kiara	⁵ <u>Haiti</u>	volunteering
Scarlett	⁶ <u>Australia</u>	⁷ <u>scuba diving</u>

6 **1.10** Listen again and match speakers 1–5 to statements A–F. There is one extra statement.

1 Rosie B 2 Oscar E 3 Jim C 4 Kiara D 5 Scarlett F

This person

- A was involved in a traffic accident.
- B enjoyed an activity so much that he/she did it several times.
- C was satisfied with his/her performance.
- D liked the countryside in the place.
- E had a friend who was out of action for three days.
- F made someone really annoyed by their actions.

7 SPEAK Choose two stories from the radio phone-in and say what you would do if you were in these situations.

FAST FINISHERS

Make a list of unusual/silly/funny things that can potentially go wrong on holiday. Search the Internet if necessary.

Extra classroom activity

After exercise 6, tell students to imagine they can go on a trip with one of the people from the recording and do the activity they described. Ask them to choose who and what, then discuss and compare with a partner. Do open-class feedback to find out which person and activity are the most popular.

Online teaching

- After exercise 2, you may prepare some *Kahoot!* questions in which students choose MAKE or DO.

Alternatively, read aloud some words and phrases and ask students to choose the verb they collocate with.

- For exercise 3, display the sentences on the e-board. Ask one student to read aloud the first sentence and the matching definition and then choose another student to read the second sentence, etc.

The Aboriginal people are the original inhabitants of Australia. Archaeologists believe that they originally arrived in Australia 45,000 years ago. Today, there are around 500 different groups of Aboriginal people living in the Australian continent, each of which speaks its own language and has its own land. Nature and the land are very important in Aboriginal culture. Today more than half of the Aboriginal people live in urban areas, although many of them retain a strong connection with their traditional way of life.

1.7 Grammar 2

Present and past habits

1 SPEAK Answer the questions.

- Do you like going on package tours?
- What is the biggest mistake you have made while travelling?

2 Read the text and answer the questions. Then study the grammar table and find examples of some of the rules in the text.

- What does it mean that the Aboriginal people were 'nomadic'? *They would move from place to place to avoid using up all the resources.*
- In what way were they different from a modern, western civilisation? *They didn't use to have personal possessions, and they would share all material things.*

The most surprising travel experience I've had was a trip to Australia. When I decided to go, I didn't realise I'd learn so much about the region and the native Australians. For example – did the Aboriginal people use to own Australia? No, because they didn't believe that any individuals should own land. These First Australians used to live a nomadic life. They would move from place to place to avoid using up all the resources of the land. I also learnt that they used to hunt giant kangaroos and wombats. And they didn't use to have personal possessions. They would share all material things. Their lifestyle was completely different from ours. I really hate the fact that people are always talking about money and shopping. (Lucas, 19)

Key Grammar

Present and past habits

To describe present habits, we use the present simple, e.g. *Every summer, I spend one week at my grandparents' house.*

To describe past habits we use:

- the **past simple** – when talking about actions/activities and states, e.g. *He lived in Canada when he was younger.*
- used to** – when talking about actions/activities and states, e.g. *I used to spend holidays in Croatia. We used to be happier.*
- would** – when talking about actions/activities, but not states, e.g. *She would visit me every weekend.*

BE CAREFUL: When we refer to the duration of the past action/habit or to a particular moment in time, we use the **past simple**, e.g. *I attended tennis classes for a few years.*

To describe annoying present habits, we use the **present continuous** with *always*, e.g. *You 're always calling me during my French classes.*

To describe annoying past habits, we use the **past continuous** with *always*, e.g. *My younger brother was always taking my tablet without asking.*

- what your city/town used to look like,
- what your teachers were always doing,
- something you got used to as an adult.

Berlin is the largest city in Germany. After World War II, in 1949, Germany was split into two countries, the Federal Republic of Germany (West Germany) and the German Democratic Republic (East Germany), when the Soviet Union blocked access routes to Berlin, which lay inside Soviet-controlled territory. Berlin was split into two territories: east and west, with West Berlin surrounded by East Germany. In 1961, East Germany built the Berlin Wall around the western part of the city and Berlin became divided. People were allowed to pass between the east and west parts of the city, but security was strict.

1.9 Writing

A formal letter of complaint

Dear Sir/Madam,

I am writing to complain about a coach journey operated by your company. I travelled to Lyon on one of your coaches, and I was extremely dissatisfied with the cleanliness standards on the vehicle, which fell short of our expectations.

The journey took place on 21 April. The first thing we noticed while we were waiting at the station was that the coach had not been washed before the trip – it was covered in mud and dirt. As soon as we got on the coach, we realised that the vehicle was equally dirty inside. Nobody had emptied the rubbish bins or cleaned the floor. As if that was not enough, the on-board toilet had not been prepared for the journey and it was giving off an unpleasant smell during the entire trip. We were not the only ones who were unhappy with the standards, but the driver ignored all of our requests to address the issue of the odour. When we arrived at our destination, he did not even apologise.

I would appreciate it if the matter was resolved as soon as possible. First of all, the coach should be either put out of service or properly cleaned so that the situation is not repeated on our way back. Moreover, due to this inconvenience, I believe the fares we paid should be refunded. I am waiting for a prompt reply.

Yours faithfully,

Graham Jones

4 Study the Key Phrases box on page 16 and complete the sentences.

- 1 I would be (most) grateful if you could resolve the problem with the lift immediately.
- 2 The least I expect is a(n) apology from the receptionist for her rude behaviour.
- 3 I would appreciate it if you contacted me directly.
- 4 I am writing to express my strong dissatisfaction with the condition of my hotel room.
- 5 To make matters worse, the train was one hour late.
- 6 As if this was not enough, the Internet connection was very poor.
- 7 The way you treat your guests falls short of expectations.

5 Look at photos A and C in exercise 2. For each of them, write one sentence making a complaint and one describing your demand. Use the Key Phrases.

6 The writer uses different narrative tenses and linking words of time and sequence to make the order of the events in the story clear. Find the following in the text. *Possible answers*

- 1 examples of the past simple *travelled, ignored*
- 2 examples of the past continuous *were waiting, was giving off*
- 3 examples of the past perfect *had emptied, had not been prepared*
- 4 linking words of time and sequence *on 21 April, as soon as, during, when*

7 Read the WATCH OUT box and choose the correct options.

- 1 We went down to the pool *afterwards* / once we had checked in to the hotel.
- 2 The bus left *meanwhile* / while we were having breakfast.
- 3 As soon as / *By the time* we found out where she was, we took our bikes to go and meet her.
- 4 My friends had already left by the time / *as* I arrived.
- 5 The two men went upstairs and *after* / then we heard lots of shouting.
- 6 As / *At first* we were getting off the bus, Karim slipped and fell over.
- 7 The train was leaving in an hour's time. *During* / Meanwhile, we went to get something to drink.

WATCH OUT Linking words of time and sequence

We use linking words and phrases of time and sequence to order events in a narrative, e.g. *when, at first, as, by the time, then, after that, afterwards, during, while, once, as soon as, meanwhile.*

8 Do the writing task. Follow the steps in the Writing Planner.

Podczas wakacyjnego kursu językowego w Londynie wybrałeś się / wybrałaś się* na dwudniową wycieczkę do Oksfordu, która okazała się ogromnym rozczarowaniem. Napisz do organizatora wyjazdu list formalny z zażaleniem (200–250 słów), opisując problemy, jakie Cię spotkały podczas wycieczki, oraz domagając się odpowiedniego zadośćuczynienia.

WRITING PLANNER

THINK

Make a list of the problems that occurred during the trip (delayed departure, poor accommodation, terrible food, etc.).

PREPARE

Organise your notes into four paragraphs:

- 1 opening greeting and reason for writing,
- 2 reporting what happened, explaining the problems,
- 3 further details about the problems and your expectations,
- 4 concluding phrase and closing greeting.

WRITE

Write your letter. Use your notes and the Key Phrases. Remember to use formal language and the correct phrases to start and end your letter.

CHECK

Read your letter and answer the questions:

- Have you included and developed both parts of the instructions?
- Is your text within the word limit (200–250 words)?
- Have you checked your letter for spelling mistakes?

FAST FINISHERS

How do you imagine the holiday of your worst nightmare? Write four sentences about the worst things that might happen to you while travelling.

Think of some unusual or ridiculous travel complaints. If necessary, look for real-life examples on the Internet.

The **Vikings** were warriors and very good sailors from the countries of Norway, Denmark and Sweden in Scandinavia around the period AD700–1100. They travelled long distances from their homelands in their boats to other countries such as France, Britain and Ireland. Throughout the ninth century, their armies invaded England, Scotland and Ireland. When they arrived, the Vikings built towns and settled in many areas, trading with local people. In the tenth century they went to Iceland, then Greenland.

The Viking Leif Erikson was born around 970. He was probably the first European to visit North America. Animators have ¹ his life story into a film. Leif's parents were from Norway, though they were living in Iceland when Leif was born. Later, in 982, his father, Erik the Red, ² out to Greenland, where he founded a community at Brattahlíð. In around 1000, Leif visited Norway, where he converted to Christianity. When he set off on the return journey to Greenland, Leif sailed off-course and ended up in a place he named 'Vinland'. He described the scenery around him as ³ and very fertile. Leif's unexpected ⁴ paid off, as he travelled back to Greenland with his ship full of grapes and wood and ⁵ skills he wouldn't otherwise have had. In the 1960s, archaeologists found some Viking ruins in Newfoundland, which they believe might have been the place discovered by Leif nearly a thousand years earlier.

WRITING

8 Read the instructions and do the task.

Niedawno wybrałeś/wybrałaś się w podróż do kurortu polecanego przez Twój ulubiony portal turystyczny. Niestety, miejsce bardzo Cię rozczarowało, a opis przedstawiony na portalu był niezgodny z prawdą. Napisz do redakcji list z zażaleniem (200–250 słów), w którym opisziesz problemy napotkane w trakcie pobytu w kurorcie oraz przedstawisz swoje oczekiwania w związku z wprowadzeniem Cię w błąd.

THE BEST JOB IN THE WORLD?

Everyone I meet says it, 'Oh, that must be the best job in the world.' In many ways, it is a wonderful job. I get to travel to lots of far-flung locations around the world and I write about them. The truth is very different, however. Travel writing is very hard work, badly paid and extremely competitive.

As a freelance travel writer, you probably make about one trip a week. A lot of the work you're asked to do is so-called 'press trips'. That is, you have been invited by a hotel, a holiday company or a tourist board to a certain place on the understanding that you write nice things about it. This type of work has become very common in the last few years, especially on social media. Essentially, you've gone to a place you didn't choose to go to, where you hang out with people you have never met before, and you have to be polite about the whole experience. It's not so bad the first few times, but after a while it ends up being a bit soul-destroying.

Then there's the accommodation and transport. As a travel writer, you have to make all the reservations and do all the research yourself. Of course, you also have to try everything in order to appeal to a wide range of people. This means I've slept in five-star hotels on very rare occasions, but it also means staying at hostels with primitive facilities for guests in locations where you don't even speak the local language. You might travel in business class, but that's very unusual, so you have to be willing to take taxis, buses, trains, scooters and other diverse means of transport to get around, sometimes at the risk of your own personal safety! That also means endless hours' waiting around in airports and stations.

Salaries in journalism in general have not risen for many years, and in travel writing, they've actually decreased. A lot of travel writing on the Internet is in exchange for nothing more than 'exposure' – your name and photo will be at the top of the article. But of course, 'exposure' doesn't pay the bills. Nowadays, with travel websites like TripAdvisor, where travellers write about their experiences in the review sections, as a travel writer you're competing with people who do your job for free! Still interested? Travel writing is certainly not the best job in the world. But despite all the difficulties, if you love travelling and writing, there's really nothing better.

Two days after that we had all in readiness for our departure.

On this voyage Jip begged so hard to be taken that the Doctor finally gave in and said he could come. Polynesia and Chee-Chee were the only other animals to go with us. Dab-Dab was left in charge of the house and the animal family we were to leave behind. Of course, as is always the way, at the last moment we kept remembering things we had forgotten; and when we finally closed the house up and went down the steps to the road, we were all burdened with armfuls of odd packages.

Halfway to the river, the Doctor suddenly remembered that he had left the stock-pot boiling on the kitchen-fire. However, we saw a blackbird flying by who nested in our garden, and the Doctor asked her to go back for us and tell Dab-Dab about it.

Down at the river-wall we found a great crowd waiting to see us off. Standing right near the gang-plank were my mother and father. I hoped that they would not make a scene, or burst into tears or anything like that. But as a matter of fact they behaved quite well – for parents. My mother said something about being sure not to get my feet wet; and my father just smiled a crooked sort of smile, patted me on the back and wished me luck. Goodbyes are awfully uncomfortable things and I was glad when it was over and we passed on to the ship. We were a little surprised not to see Matthew Mugg among the crowd. We had felt sure that he would be there; and the Doctor had intended to give him some extra instructions about the food for the animals we had left at the house.

At last, after much pulling and tugging, we got the anchor up and undid a lot of mooring-ropes. Then the *Curlew* began to move gently down the river with the out-running tide, while the people on the wall cheered and waved their handkerchiefs.

1.2 Past tenses: past simple, past continuous, past perfect

PAST SIMPLE

Czas *past simple* (druga forma czasownika, w czasownikach regularnych: końcówka *-ed*) stosujemy do opisu:

- czynności, które wydarzyły się w określonym momencie w przeszłości, np.: *I ran into a girl from our school during my holiday in Iceland last summer.*
- zdarzeń, które przerwały jakąś czynność, np. *Sinead was hunting for souvenirs when someone stole her purse.*

Affirmative	Negative
<i>He visited</i> five countries last year.	<i>They didn't take</i> any photos of the city skyline.
Yes/No questions	Short answers
<i>Did she go</i> backpacking?	Yes, she <i>did</i> . / No, she <i>didn't</i> .
Wh- questions	Subject questions
<i>What did</i> you buy at the flea market?	<i>Who chose</i> this tour company?

Określenia czasu typowe dla *past simple* to m.in.: *yesterday, the day before yesterday, (two days) ago, last (summer), at (Christmas/6 pm), on (5 November), in (May/2020), then, when, afterwards.*

PAST CONTINUOUS

Czas *past continuous* (*was/were* + czasownik z końcówką *-ing*) stosujemy do opisu czynności:

- trwających w określonym momencie w przeszłości, np. *I was talking* to my boss when you called me in the morning.
- będących tłem dla innych czynności, np. *The sun was shining* bright when Tyler left for work.
- przerwanych przez inne czynności, np. *We were admiring* the stunning scenery when there was a loud bang.

Affirmative	Negative
<i>I was wandering around</i> the old town.	<i>She wasn't complaining</i> about the service.
<i>You were saving up</i> for a trip to Miami.	<i>We weren't staying</i> at a B&B.
Yes/No questions	Short answers
<i>Was he travelling</i> solo?	Yes, he <i>was</i> . / No, he <i>wasn't</i> .
<i>Were they packing</i> their suitcases?	Yes, they <i>were</i> . / No, they <i>weren't</i> .
Wh- questions	Subject questions
<i>Why were</i> you arguing?	<i>How many people were sunbathing</i> by the pool?

Określenia czasu typowe dla *past continuous* to m.in.: *in the (evening), at (10 am), at that time, then, when, while, as.*

PAST PERFECT

Czas *past perfect* (*had* + *past participle*) opisuje zdarzenia, które miały miejsce przed innymi zdarzeniami z przeszłości, np.

The kids wanted to go to the zoo even though we had been there many times before.

Affirmative	Negative
<i>We had visited</i> the science museum by then.	<i>He hadn't travelled</i> with a low-cost airline before.
Yes/No questions	Short answers
<i>Had he ever rented</i> a car?	Yes, he <i>had</i> . / No, he <i>hadn't</i> .
Wh- questions	Subject questions
<i>What had</i> you bought by the time we met for lunch?	<i>Who had eaten</i> octopus before?

Określenia czasu typowe dla *past perfect* to m.in.: *by the time, by then, by (two o'clock/Monday/April/1999), ever, never, already, before, after.*

1.7 Present and past habits

Czynności powtarzalne i zachowania charakterystyczne dla konkretnych osób – teraz lub w przeszłości – można w języku angielskim opisać za pomocą różnych czasów i konstrukcji gramatycznych.

- Za pomocą czasów *present simple* i *past simple* opisujemy czynności i stany powtarzające się w teraźniejszości lub w przeszłości, w tym przyzwyczajenia i nawyki, np.: *We always take out* travel insurance before going abroad. *When I was in Rimini, I went* swimming every day.
- Za pomocą czasów *present continuous* i *past continuous* opisujemy teraźniejsze lub przeszłe powtarzalne zachowania, które nas irytują, np.: *You're always complaining* about everything. *My flatmates were always making* a lot of noise in the morning, so I eventually moved out.

UWAGA!

W mowie potocznej *always* może zostać zastąpione przez *forever*, np. *They are forever talking* about their honeymoon.

- Za pomocą konstrukcji *used to* + bezokolicznik opisujemy powtarzalne czynności i stany z przeszłości, w tym przyzwyczajenia i nawyki, np.: *I used to hate* driving, but now I don't mind it.

- Za pomocą konstrukcji *would* + bezokolicznik opisujemy powtarzalne czynności i zachowania (nie stany) z przeszłości. Forma ta jest powszechnie używana m.in. w odniesieniu do sytuacji, o których myślimy z rozrzuwieniem, i występuje tylko w zdaniach twierdzących, np.: *Mum would always ask Grandma* for advice before making an important decision.

UWAGA!

Informację o czasie trwania czynności powtarzalnej z przeszłości można zawrzeć jedynie w zdaniu w czasie *past simple*, np. *I practised* this song every day for two weeks.

- Za pomocą konstrukcji *be used to* + czasownik z *-ing* (być przyzwyczajonym do robienia czegoś) oraz *get used to* + czasownik z *-ing* (przyzwyczajając się do robienia czegoś) opisujemy przyzwyczajenia w różnych czasach gramatycznych, np.: *The young dancer wasn't used to* performing in front of such large audiences. *Sooner or later, you'll get used to* the cold weather.

UWAGA!

Po *be used to* i *get used to* może wystąpić również rzeczownik, np. *He needs time to get used to* his new phone.

Driverless cars (autonomous cars or self-driving cars) are able to sense the surroundings and move around without human input. The first self-driving car prototype was operated by Google under Alphabet Inc. in 2015. It's estimated that with autonomous cars there will be 80 percent less emissions, 90 percent fewer accidents, and 40 percent less traffic congestion.

Robots are getting more and more intelligent and sophisticated. Shimon is a robot with musical abilities. It uses information scientists have programmed into its system to play music that it can create itself. NASA has built a robot to give astronauts more time to do research when at the International Space Station. The robot has been programmed to do some of the astronauts' daily tasks, such as doing the housekeeping and monitoring.

Virtual reality (VR) is an interactive experience which incorporates sounds and visual effects fed to the user through a headset. VR is often used for leisure activities, such as 3-D cinema and games, but it can also be used to provide a controlled environment when training people to deal with situations in a professional context, e.g. medicine.

An **intelligent virtual assistant** (e.g. Siri, Alexa) is software that performs tasks based on questions or commands from the owner of the device.

Exercise 2

3 – Bluetooth® was in fact named after King Harald 'Bluetooth' Gormsson, who united the tribes of Denmark and Norway in 958 AD. The king's nickname, however, is not due to his teeth turning blue as a result of eating blueberries. One of Harald's teeth was dead and turned a dark blue colour, earning him the nickname.

SPEAK Look at the photos and read the quote. Discuss the following.

Technology is a useful servant but a dangerous master.

Christian Lous Lange
(Norwegian historian and Nobel Peace Prize winner, 1869–1938)

- Give one advantage and one disadvantage of how technology is being used in each of the photos.
- Imagine you are writing a magazine article entitled 'Future Solutions'. Which of the photos would you choose for the front cover? Why?
- Explain the meaning of the quote, using the examples in the photos. What can be done to prevent technology becoming a dangerous master?

- 1 **SPEAK** Complete the questions with the correct forms of the verbs from the box. Then answer the questions in pairs. There may be more than one correct answer.

check install post scam set update

- 1 How often do you update/check your social media profiles and post comments?
- 2 Have you ever been scammed online or reported something suspicious?
- 3 Do you protect your online accounts by setting strong passwords?
- 4 When did you last check/update your phone?
- 5 Who installs/installed / updates antivirus software on your PC?

- 2 Read the text and find one piece of information that is false.

TECHNOLOGY: FACT OR FICTION?

1 **Driverless cars** are becoming so efficient that they don't need any human intervention. In the future, humans may be banned from driving altogether.

2 In some countries, such as Sweden and the USA, **microchip implants**, which connect to the Internet, are **embedded** into employees' hands so they can open doors or pay for food at the wave of a hand.

3 Bluetooth®, one of the first wireless technologies, was named after a king of Norway and Denmark who was so fond of blueberries that his teeth turned blue, hence his nickname. Bluetooth® connects anything, from **domestic appliances** to earbuds, with your mobile devices, just like the king united his warring nations.

4 The latest plans for robots and **virtual assistants**, such as Siri, Alexa or Cortana, are to make them **emotionally interactive**, which means they will detect users' moods and respond accordingly.

5 Every minute, over five hundred hours of video material are uploaded to YouTube. If you started watching it today, you still wouldn't have watched all the content by the end of your life.

6 Instagram currently **hosts** over fifty billion photos. If that's too much for you, try using the **'mute'** option, which allows you to stop seeing a user's feed without **unfollowing** them.

3 KEY WORDS Match the highlighted words and phrases from the text to definitions 1–9.

- stores on a server so that it can be accessed over the Internet *hosts*
- stop seeing someone's content on social media without unfriending them *mute*
- no longer following someone online *unfollowing*
- fixed in something else (e.g. a surface or an object) *embedded*
- very small pieces of silicon that contain the electronic connections to make a computer work and can be inserted into the skin *microchip implants*
- machines or equipment that you have in your home *domestic appliances*
- software agents that respond to instructions and do tasks to help the user *virtual assistants*
- which interprets and responds to people's emotions (about a computer) *emotionally interactive*
- cars that can drive themselves *driverless cars*

4 1.12 Listen to the conversation and complete the message with the correct forms of the highlighted words and phrases from the text.

Guess what! I've spoken to Louis, and he's not going to do the driving licence course. He says it's pointless, as by the time he can afford a car, we'll all be using ¹ *driverless cars*. We had an interesting discussion about cars being equipped with a ² *virtual assistant* that will be ³ *embedded* in the car operating system and will interact with the passengers. Louis claims such systems will be ⁴ *emotionally interactive* and able to detect your mood. It's possible that through wireless technology cars will be connected to our devices, or maybe we will have ⁵ *microchip implants* in our hands so that nobody will be able to operate your car but you. It got me thinking ... Should we start the driving course at all? Perhaps it makes no sense ... What do you think? Mila

5 KEY WORDS Match the highlighted adjectives in sentences 1–7 to the adjectives a–g which have a similar meaning.

- My smartphone is *outdated* – it can't support the latest software. *e*
 - The new system is really *user-friendly*. *d*
 - The most *feasible* explanation is that your licence has run out. *a*
 - The current system is *defective* due to faulty programming. *g*
 - The developments in artificial intelligence are *intriguing*. *b*
 - Wired* is an online magazine about *cutting-edge* technology. *c*
 - The authorities discussed the availability of *broadband* technologies in underprivileged areas. *f*
- a possible e old-fashioned
b fascinating f high-speed
c up-to-date g problematic
d intuitive

6 Complete the sentences with the correct forms of the highlighted words and phrases from exercises 2 and 5.

- Bluetooth® does not need a *bluetooth* connection, so it doesn't use any data.
- There are too many limitations, so none of the solutions is really *feasible*.
- The device we bought was *defective*, and we were forced to return it.
- Do you have any kitchen *appliances* that are operated through Bluetooth®?
- Keep all your devices *connected* through the entire meeting, please.
- To be honest, I felt hurt when I learnt that Mike had *unfollowed* me.
- I'm not complaining about the operating system – I just need a PC with a *cutting-edge* design.

7 SPEAK Choose one of the predictions below and discuss what life will be like if it comes true.

- By 2040, robots will be recognised as a species.
- By 2026, ten percent of all cars in the USA will be driverless.
- Within the next decade, all of our devices will be emotionally interactive.
- In the near future, babies will have microchip implants embedded in their bodies when they are born.

8 SPEAK Describe the video still and answer the questions.

- Which of the following do you think inventors have used to make a bionic hand? *3-D printer, electrical tubes, fishing line, Lego blocks*

3-D printer drone remote control electrical tubes
fishing line Lego® blocks titan implants

- How might a person with a bionic hand feel? *Students' own answers*

FAST FINISHERS

Imagine you could get a bionic hand to help you out in your everyday life, for example with chores, schoolwork, etc. Name three of its functions that would be essential.

Extra classroom activity

As a lead-in, encourage students to interpret the photo with the robot. Ask questions promoting visual literacy, e.g. *How does the photo make you feel? If it was on a book cover, what could the title be? What does it tell you about the future?*, etc.

Online teaching

The future

To talk about the future, we use:

- a the present simple for timetabled events, e.g. 1,
b the present continuous for confirmed arrangements, e.g. 8,
c *be going to* for intentions or plans, e.g. 7,
d *will* for hopes, expectations and predictions, e.g. 6,
e *be going to* for predictions based on evidence, e.g. 2,
f *will* for spontaneous decisions or offers, e.g. 9,
g the future continuous (*will + be + -ing*) for actions in progress at a future point in time, e.g. 5,
h the future perfect (*will + have + past participle*) for actions completed by a future point in time, e.g. 4,
i the future perfect continuous (*will + have been + -ing*) for actions that will continue up to a point in the future, to underline their duration, e.g. 3.

Giving a presentation

- 1 **SPEAK** Are you comfortable with public speaking? Why/Why not?

- 2 **1.13** Listen to the beginning of a presentation about the future of transport in cities. What three topics is the speaker going to cover?

existing technological solutions, emerging technological solutions, solutions for further into the future

- 3 **1.13** Read the **WATCH OUT | SKILLS** box and study the Key Phrases box. Then listen again. Which Key Phrases did you hear?

WATCH OUT | SKILLS**Signposting**

When giving a presentation, help your audience to follow you by 'signposting'. Begin by telling them the topic of your talk. Then say what you are going to talk about first. Next, explain what other areas you are also going to cover and finally how you are going to finish.

Key Phrases**Giving a presentation****Introducing the topic**

There is strong evidence to support ...

The problem with this argument is that ...

Finishing your presentation

Finally, I'd like to draw your attention to ...

And finally, I'll mention ... ✓

My final point is that ...

OK, that's all from me.

I hope you found the presentation interesting.

If anyone has any questions, please feel free to ask now. ✓

- 4 Complete the presentation excerpts with up to three words in each gap.

1 Dear Parents! Today, I'd like to draw your attention to an issue that concerns all teenagers, namely the amount of pocket money that we all receive. There are several reasons why I believe our weekly allowance should be raised. Here are some of them.

2 While there is strong evidence that regular tests make students study more and positively influence their academic results, the problem with this argument is that it does not take into account students' emotional needs.

3 Another point that I want to make is that we are not given a chance to suggest our own solutions. It is a fact that students' opinions are rarely listened to by the school authorities.

4 So I guess that's all from me. Thank you very much for listening, and I hope you found my presentation interesting. If you have any questions, please feel free to ask, and I will try to answer them now.

- 5 **1.14** Read the **WATCH OUT** box. Then listen to the groups of words in connected speech. Which words are linked? Identify the type of link used (a or b).

1 discuss other solutions
a, discuss other solutions

2 today I'm going to
b, today I'm going to

3 talking about transport
a, talking about transport

4 what we know about
b, what we know about

5 talking to you about
b, talking to you about

6 science and technology
a, science and technology

WATCH OUT**Connected speech**

When we are speaking, we connect words to make them easier to pronounce without a break. It can be done in different ways:

a by linking the final consonant of one word with the initial vowel or semi-consonant of the next, e.g. *good evening; thank you*

b by inserting a /j/ or /w/ sound between two vowels, e.g. *I /j/ agree; it's too /w/ easy.*

- 6 **SPEAK** Go to page 156 and choose one of the topics shown in the photos. Prepare a short presentation about the future to give to the class.

FAST FINISHERS

Imagine you are planning the next April Fools' Day at school. Make a list of silly topics on which students could make presentations, e.g. why there should be a circus in your school.

Find a TED talk on a topic that you find interesting. Watch it and tell the class two things you have learnt from it.

Extra classroom activities

- As a lead-in, write the following tips for public speaking on the board. Give students time to decide if the tips are good or not. Then, have a class discussion. *Learn the presentation by heart. Use humour and tell stories. Grab attention at the beginning. Use gestures. Read from your notes.*
- After exercise 6, have students give their presentation twice – each time to a different pair

or group. The observers evaluate their classmates' presentations and suggest improvements.

Online teaching

- For exercise 3, display the Key Phrases on the screen. Ask one volunteer to read them aloud. Ask students to recall which phrases were used in the dialogue.
- For exercise 6, you may play a part of a presentation that you can find online. Ask students to pay attention to how the speaker

introduces the topic / organises ideas / finishes the presentation.

- 2 Read the **WATCH OUT | SKILLS** box. Then look at the pictures and the title of the text on page 27. What do you think the text is about? What ideas might it mention?

WATCH OUT | SKILLS

Predicting the content of a text

Use all the information available about a text to make predictions about its content: the instructions, photos or illustrations, title, design and layout, comprehension questions and your existing knowledge of the subject.

- 3 **1.15** Read the article and check your answers to exercise 2. *The text is about a futuristic device called AlterEgo, which is a mind-reading tool that can communicate with the wearer through a message from the brain to facial muscles.*

- 4 Read the article again and choose the correct options.

- AlterEgo will tell you the time if you
 - say the word 'time'.
 - think the word 'time'.
 - look at a clock.
 - hear the word 'time'.
- According to Musk, brain implants will
 - replace headsets in the near future.
 - make people less intelligent.
 - connect to the AlterEgo headset.
 - be secret devices.
- Specialists claim that implants
 - won't be affordable for ordinary people.
 - have replaced speech and writing.
 - will become popular within ten years.
 - will change the way science-fiction films are made.
- The 'new form of communication' is
 - telepathy.
 - implants.
 - multi-tasking.
 - mind reading.

- 5 Answer the questions.

- Why do you think the writer uses the example of films?
- How would a user of AlterEgo look up information on the Internet?
- What kind of device is Elon Musk developing?
- How does Elon Musk see implants working?
- How will these devices alter human communication?

- 6 **KEY WORDS** Match the highlighted words and phrases from the text to definitions 1-7.

- combine to become one *merge*
- connect *link up*
- making progress *making strides*
- not natural, created by people *artificial*
- received (about a signal) *picked up*
- improving *enhancing*
- which can be worn on your body *wearable*

- 7 **SPEAK** Complete the questions with the words from exercise 1 and the highlighted words from the text. The first letters are given. Then discuss the questions in pairs.

- Do you believe in *secret/secretive* high-tech projects that remain unknown to the public?
- Is technological development really *enhancing* our quality of life, or does it do more harm than good?
- Do people really *pick up* signals from other planets, or is it just a scam?
- If technology and sport *merge*, will such a combination be good for sportsmanship?
- Is design or functionality more important in *wearable* devices?
- Will speech remain the primary way of *communication* in the near future?
- Which field of science will make the greatest *strides* within the next two decades?

- 8 **SPEAK** Answer the questions.

- Would you like to be able to communicate through telepathy? Why/Why not?
- Imagine you have to prepare a talk about mind-reading technology. Would it be a presentation about opportunities or threats? Why?
- What were the most important technological developments in the last ten years? How would you rank mind reading on this list?

FAST FINISHERS

- Think of at least three ways in which you could use mind-reading technology in your daily life.

Search online for other exciting new technologies that are being developed. Choose one and write down its potential advantages and disadvantages.

Exercise 5

Possible answers

- Because this kind of technology has only been possible in science-fiction films up to now.
- The mind-reading device would link up to an AI device to find the information.
- He is developing interfaces that are meant to transmit users' thoughts and commands directly to a computer.
- An implant will send your thoughts directly to a computer, so you won't have to type or say anything.
- Instead of communicating through speech and writing, we will use mind-reading technology.

Extra classroom activity

As a lead-in, share the information below and ask students to give their opinions about how they think the boy is able to know what his mother is thinking and how he is capable of knowing so many other languages:

A young boy called Ramses Sanguino from Los Angeles, USA, is being studied by scientists after surprising people with his mind-reading,

or telepathic, abilities. When he was only five years old, he could sit opposite his mother, and when she thought of a number, he could say the number she was thinking of. At the moment Ramses is studying physics at college, as well as being educated by his mother at home. Ramses is autistic, which means he has limited development of communicating through speech and also limited social skills. However, he started reading when he was 12 months old

and was able to speak some Russian by the age of 13 months and Japanese by the age of two. He is currently learning seven languages, including Hebrew and Arabic, as well as being able to solve complex mathematical problems. Dr Diane Powell, one of the scientists studying Ramses, believes that telepathy is an alternative method of communicating, especially between autistic children and their parents.

MIND-READING TECHNOLOGY:

The Headset That 'Hears' Your Thoughts

Until recently, mind-reading technology was something we'd only seen in science-fiction films. The evil villain uses a mind-reading machine to extract information directly from the hero's brain. 'In a few minutes,' the villain hisses, 'I will have all the information I need ...'

However, this technology is no longer the stuff of films. A group of researchers at MIT's Media Lab recently presented a **wearable** headset called AlterEgo that can interpret 'silent speech' inside the user's head. Anything that the user 'messages' from the brain to the facial muscles can be **picked up** by the headset, so if you want to find out what the weather will be like tomorrow, you can mouth the question 'Weather tomorrow?' and the headset will respond by giving you a weather forecast through a small earphone.

Devices like AlterEgo will eventually be able to **link up** to existing **artificial** intelligence devices, like Apple's Siri or Amazon's Alexa. They will read your thoughts and then look up the information you need, download a recipe or make a purchase for you.

Major tech companies are now **making** huge **strides** in the development of wearable devices which read your mind. Elon Musk, the man behind Tesla cars and SpaceX, has announced that his company, Neuralink, is developing interfaces

which will allow users to communicate directly with computers using only thoughts. Musk is predicting that in a few years, we will be able to implant tiny electronic devices in the brain which will **merge** machine and human, thus **enhancing** human intelligence.

Musk's vision of the future is that users will be sitting at home, and they will be able to connect to different devices or software through interfaces, without typing or even speaking. An implant is going to be able to interpret what you're thinking and, for instance, send a message to a friend telling them you're going to show up a little later than planned.

Tech experts are convinced such devices and implants will be in general use within the next decade. Some predictions even foresee everyone with headsets or implants interacting by way of telepathy – you will be communicating with other people only through your thoughts. Humans have exchanged information using speech and writing for millennia, and now a new form of human communication is coming thanks to mind-reading technology.

So, I guess, in a few years' time, when we can all read everyone's thoughts, heroes will have been forced to come up with a new way of hiding information from evil villains.

internal: blood, bones, muscle, spine, stomach
external: ankle, arm, back, cheek, chest, ear, elbow, finger, foot, head, knee, leg, nose, shoulder, stomach, toe, wrist

- 2 Read the text and decide which of the medical developments it mentions is the most important for humanity.

MERGING TECHNOLOGY WITH MEDICINE

There are many areas in which high-tech innovations are brought into general use – sport, fashion and education, all make use of state-of-the-art,

cutting-edge technology. Today, we are looking for your personal experiences. Do you ever benefit from such developments in medicine? Share your opinions below.

I admit that as well as going to the gym, I often enjoy the benefits of aesthetic medicine. I regularly visit a plastic surgeon who helps me keep my figure ¹ trim. With appropriate treatment and equipment, I'm muscular and ² lean without much effort. Also, last year, I had all my skin marks removed (³ birthmarks/moles and ⁴ moles/birthmarks), and I have no ⁵ scars. I'm pretty sure that by the time I turn forty, I will have undergone many more treatments.

I had surgery that was conducted by a robot! Can you imagine? The doctor diagnosed me with ⁶ kidney/bladder and ⁷ bladder/kidney stones – an extremely painful condition. Instead of open surgery, I was operated on by a surgeon using a da Vinci robot system. It was much less invasive than a conventional operation, only a few small cuts in my abdomen. Basically, the surgeon can use these robots to perform most surgical procedures on the digestive organs, such as the ⁸ pancreas/liver, ⁹ liver/pancreas and large and small ¹⁰ intestines. It's a real miracle!

I'm a medical student, and I benefit from technology a lot. Thanks to VR, by the time I start working in a hospital after I graduate, I will have practised a whole range of procedures without inflicting pain on patients. Next week, for example, we will be looking inside a person's chest to see how the ¹¹ lungs absorb oxygen and how the ¹² veins carry the blood back to the heart. I can't wait!

- 3 **1.16 KEY WORDS** Complete the text in exercise 2 with the highlighted words below. There are five extra words. Then listen and check. There may be more than one correct answer.

A podcast about human creativity

Venn diagrams get their name from John Venn, a British mathematician (1834–1923). He used them in a paper which he published in 1880. They are used to compare and contrast information and to show what groups of things have in common and how they are different.

- 1 **SPEAK** How do you understand the saying below? Can you give examples from your own life?
Great minds think alike.

- 2 **KEY WORDS** Complete the diagram with highlighted phrases below.

brainstorm solutions • consider alternatives
draw conclusions • identify pros and cons
imagine possibilities

- 3 Choose the correct options.

- When you have a problem to solve, start by brainstorming solutions / using your intuition. Write down ideas as people think of them.
- Be creative and playful and identify pros and cons / imagine all of the possibilities that you can think of – the more, the better.
- Remember to suspend judgment / draw conclusions of people's ideas – just because you don't like something, it doesn't mean that it's wrong.
- Once you have got a list together, you can start to use your intuition / identify the pros and cons of each solution (the good points and the bad points).
- Think about the future and try to consider alternatives / predict the effects of each solution – if we choose this one, or that one, what will happen?
- Finally, when you have been through all these stages, you will be able to draw conclusions / consider alternatives about your ideas.

- 4 Match the words from the box to the correct categories. Then add other derivatives.

- ☐ 2 HUMAN COMMUNICATION
- ☒ 3 NEUROSCIENTIFIC STUDIES
- ☐ 4 PSYCHOLOGY
- ☒ 5 HUMAN ACHIEVEMENTS
- ☒ 6 PERSONALITY TRAITS OF CREATIVE PEOPLE

- 6 Listen again and complete the sentences. Possible answers

- The examples of Mozart and Edison show that humans are able to do unbelievable/incredible/amazing things.
- The speakers wonder if geniuses follow a certain plan/pattern in their work.
- Creativity has very little / hardly anything to do with your intelligence level or IQ.
- A study on musicians showed that creativity is located in several parts of the brain.
- What all creative people have in common is independence, tolerance of mess and the willingness to take risks.
- Human creativity has enabled some of the major achievements of mankind, such as the Moon landing or producing cars / the first car.
- Science and technology have changed the way we live, eat, travel and work.

- 7 **SPEAK** Answer the questions.

- Which of the skills connected with creative thinking do you have? Which would you like to have? Why?
- Is creativity always helpful? Why/Why not?
- What is more important, creative thinking or critical thinking?

Other futures: be about to; be due to; be + *infinitive* • Future in the past

1 SPEAK Answer the questions.

- 1 How will mobile phones change in the future?
- 2 Which cure will scientists have developed by 2050?

2 **1.18** Read the summary of the podcast from the previous lesson and choose the best ending. If necessary, listen to the podcast again.

The podcast was about how scientists were going to find out more about creativity. The speakers started by enumerating some famous names, for instance Thomas Edison. He was an extremely creative inventor who probably did not plan his work, so he never suspected that he would revolutionise technology.

The speakers then focused on how to research creativity. Scientists who wanted to learn more about the topic scanned the brain activity of creative thinkers, for example jazz musicians. Neurobiologists felt they ‘were about to discover something big, but no major conclusions were drawn. They were continuing their research, however, and ‘are to announce their results in two years, when their final report ‘is due to be published.

Perhaps we will never learn more about creativity than we already know, which makes the secretive nature of creative minds even more intriguing and unique. We need to bear in mind, however, that mankind ...

- 1 wouldn't have progressed without them.
- 2 would be better off without them.
- 3 would be replaced with technology.

3 Study the grammar table. Complete the table with examples a–e from the text in exercise 2.

Key Grammar

Other ways of talking about the future

- *be about to* + infinitive is used to say that something is going to happen very soon, e.g. ¹ c

Have you ever heard of SWOT analysis? It's a way of brainstorming ideas and thinking ' carefully (careful) about a topic before taking any binding decisions. The analysis means suspending ' judgment (judge) before you consider the strengths, weaknesses, opportunities and threats – or SWOT – involved in choosing the best ' solution (solve). With such an approach, several questions require answering, for instance: 'Is the idea good enough to make everyone ' convinced (convince)?', 'Will it really result in any kind of ' improvement (improve)?', 'Are there any ' predictable (predict) obstacles?' The next time you want to embark on a project you're not sure about, try out a SWOT analysis! It will definitely help.

- 6 **SPEAK** Discuss the questions in pairs.

DOES 'URBAN' ALWAYS EQUAL 'CONGESTED'?

- 1** I'm on a bus, coming home from school. In fact, I've been on this bus for almost an hour, although the journey should take no longer than fifteen minutes. I look out of the window and see a city taken over by slow-moving cars, buses, lorries and other vehicles, crawling along the streets. All I can think of is that, unless authorities cut down and control the amount of traffic in urban centres, some day we won't be able to move around at all.
- 2** Let's face it – traffic jams have become part of city life. Sooner or later, the traffic in many cities will reach total gridlock. Some experts argue that the traffic flow systems aren't flexible enough to cope. In the near future, cities will be installing smart traffic lights, which will analyse the amount of traffic flowing past them and will modify how frequently the lights change to clear traffic more efficiently.
- 3** The size and occupancy of cars in urban areas is also a matter of concern. Most private cars in circulation are occupied by one person. Nowadays, there are apps that enable people to share car journeys. Experts predict that in ten or twenty years' time, many cars will have been replaced by independently moving electric pods. Before long, these pods will be all over our streets, delivering people and goods around the city.
- 4** The issue of traffic in our cities is absolutely crucial. It's only a matter of time until the authorities begin to introduce technological solutions to improve traffic flow and to reduce the number of vehicles on the streets. And they had better hurry up ...

- 1** **SPEAK** Suggest three solutions which could improve public transport in your area.
- 2** Read the text and answer the questions.
- What are the two greatest traffic-related problems in cities, according to the author? *inflexible traffic flow systems, large cars carrying only one person*
 - What solutions does the author describe? *smart traffic lights, car-sharing, electric pods*
 - Where do you think you would find a text like this? Give reasons for your answers. *In an online magazine or blog, as it is an opinion piece rather than a newspaper article.*
- 3** Read the article again and match paragraphs 1–4 to points a–h. Some of the points match more than one paragraph.

Using current methods, the bioprinter ⁵ was able to produce an endless supply of real human skin, which researchers ⁶ are using for testing purposes, mostly for cosmetics and other pharmaceuticals. In the long term, it is possible that the printed skin will be used to help burn victims. The team ⁷ will have been able to with the idea of creating human skin that can grow hair, and they are currently investigating how this ⁸ will be achieved. In the future, they think they will be able to print entire human organs, such as kidneys.

Gazetka szkolna publikuje cykl artykułów o wpływie postępu technologicznego na turystykę. Napisz artykuł o komercyjnych lotach w kosmos (200–250 słów), w którym opisziesz, dlaczego ludzie decydują się na takie loty, oraz przedstawisz swoją opinię na ten temat.

2.2 The future

Czas *present simple* stosujemy, gdy chcemy opisać wydarzenia zaplanowane w harmonogramach, rozkładach jazdy itp., np. *My plane **lands** at 2 pm, so I'll have plenty of time to get to the hotel.*

Czas *present continuous* stosujemy, gdy mówimy o wydarzeniach zaplanowanych na najbliższą przyszłość, których szczegóły są już znane, np. *Ben and Alice **are coming** over for dinner tomorrow, so we need to go shopping later today.*

Konstrukcja *be going to* + bezokolicznik służy do opisywania:

- ogólnych planów i zamierzeń, które mogą ulec zmianie, np. *My dad says that he's **not going to** buy a driverless car, no matter how cheap they are.*
- przewidywań dotyczących przyszłości popartych dowodami lub opartych na obserwacji tego, co dzieje się w chwili obecnej, np. *I haven't finished my essay yet, and the deadline is today. I'm **going to** get an F.*

Za pomocą konstrukcji *will* + bezokolicznik możemy wyrazić:

- ogólne przewidywania i nadzieje na przyszłość nieoparte konkretnymi dowodami, np.: *Let's hope it **won't** be too cold tomorrow – otherwise they'll cancel the open-air concert.*
- spontaniczne decyzje i propozycje, np.: *Let's work together. I'll cook the pasta, and you'll make the sauce.*

Czas *future continuous* (*will* + *be* + *-ing*) stosujemy, gdy chcemy opisać:

- czynności, które będą trwały w określonym momencie w przyszłości, np. *This time next week, we'll **be watching** the new James Bond film at the cinema.*
- zdarzenia, co do których jesteśmy pewni, że nastąpią w przyszłości, np. *I'll **be going** to the chemist's after work, so let me know if you need anything.*
- czynności, które mają miejsce regularnie i z pewnością będą miały miejsce w określonym momencie w przyszłości, np. *I won't be able to meet you at twelve – I'll **be having** my driving lesson then.*

Określenia czasu typowe dla *future continuous* to, m.in.: *at (9 am), on (30 November/Sunday), in (June/2025), in (five) years' time, this (week), next (month), this time next (year).*

UWAGA!

Za pomocą czasu *future continuous* można również wyrazić uprzejmą prośbę lub zapytanie, np. *Will you **be using** your e-reader tonight? I'd like to borrow it.*

Czas *future perfect* (*will* + *have* + *past participle*) stosujemy, gdy mówimy o czynnościach i stanach, które zakończą się do określonego momentu w przyszłości, np.: *If all goes well, we'll **have graduated** from medical school by the age of twenty-five.*

Określenia czasu typowe dla *future perfect* to, m.in.: *by (3 pm), by (17 March/Monday), by (2040), by the end of next (week), by the time (subject + verb), by the age of (forty).*

Czas *future perfect continuous* (*will* + *have* + *been* + *-ing*) służy do opisywania czynności i stanów, które będą trwały w określonym momencie w przyszłości już od jakiegoś czasu. Używamy go wtedy, kiedy chcemy położyć nacisk na czas trwania danej czynności lub po prostu o nim poinformować, np.: *By five o'clock, I'll **have been trying** to fix your tablet for three hours.*

Określenia czasu typowe dla *future perfect continuous* to, m.in.: wszystkie określenia typowe dla czasu *future perfect* oraz: *when, for (six) (years).*

UWAGA!

W tzw. *future time clauses*, a więc po wyrażeniach: *when, as soon as, until, before, after* itp., zwykle występuje czas *present simple*, np. *Mum won't start making dinner until we're all back home.*

Aby położyć nacisk na to, że dana czynność musi zostać zakończona, zanim stanie się coś innego, zamiast *present simple* można użyć *present perfect*, np. *I'll mute the TV as soon as I've found the remote.*

2.7 Other futures: *be about to*; *be due to*; *be* + infinitive • Future in the past

Other futures

- Konstrukcja *be about to* + bezokolicznik służy do opisywania zdarzeń, które będą miały miejsce w bardzo niedalekiej przyszłości. W języku polskim podobne znaczenie wyrażamy za pomocą sformułowania „zaraz/za chwilę (zrobię/będę robić)...” np.: *I'm **about to** make a cup of tea – do you want one too?*
- Konstrukcję *be due to* + bezokolicznik stosujemy do opisu zdarzeń, które są z góry zaplanowane lub których się spodziewamy, np.: *The IT manager **is due to** submit his report by the end of the week.*
- Konstrukcja *be to* + bezokolicznik jest charakterystyczna dla stylu formalnego i opisuje oficjalne plany, ustalenia i obowiązki, np.: *We **are to** pay the rent by the 20th of June.*

UWAGA!

Istnieje jeszcze kilka innych, podobnych form odnoszących się do przyszłości, m.in.:

- be supposed to* + bezokolicznik – do opisu oczekiwań i wymagań względem kogoś lub czegoś, np. *Students **are supposed to** hand in three essays by the end of the term.*
- be (un)likely to* + bezokolicznik – do opisu zdarzeń, które są (mało) prawdopodobne, np. *She hasn't got much experience, so she's **unlikely to** get the job.*

Future in the past

Future in the past stosujemy, mówiąc o wydarzeniach, które z perspektywy przeszłości miały dopiero nastąpić. Najczęściej korzystamy z *future in the past* w mowie zależnej, tzn. przytaczając czyjeś słowa dot. przyszłych zdarzeń, które do tej pory być może miały już miejsce.
