Tod Hello! I'm Tod. Welcome to the *Around Mexico* podcast. Every week, we phone people in their favourite place. Today, we're phoning a family in Xochimilco. Hello? Is that Luis?

Luis Yes, it is.

Tod Hi Luis, good to hear you. What are you doing at the moment?

Luis We're on a boat, and we're having a great time. We've got a lot of food. My mother is setting the table. My father and my uncle are playing cards.

Tod Is your father winning?

Luis No, he isn't. He's losing. He's a bit fed up. My uncle is winning. He's smiling!

Tod What are your brother and sister doing?

Luis My sister's sunbathing. My brother isn't sunbathing. He's sitting in the shade and he's playing a guitar. He's singing some old pop songs and my aunt is singing with him but, I think she's crying!

Tod Are your grandparents singing too?

Luis No, they aren't. They're talking. I think my grandfather is telling a joke, because my grandmother is laughing.

Tod And you? What are you doing?

Luis I'm chilling. I'm drawing my family. Sorry, I can't talk anymore. Lunch is ready!

Tod Thanks, Luis. Enjoy your meal!

A

Mexico City, pollution and you

Mexico City is the capital of Mexico. It's a city in the mountains and, with a population of over 8 million, it's one of the world's megacities. It's big, it's exciting, but it's very busy ... and there's also a lot of pollution.

Air pollution in Mexico City can be very bad. On at least 100 days every year, there are dangerous levels of pollution. Where does the smog come from? From cars. There are three and a half million cars, buses and lorries on the streets of the city every day. They make a lot of pollution.

There are other types of pollution in Mexico City too. Water pollution is a big problem for the people who live there. The rivers in the city are very polluted and fish can't live there. The water is dirty and it isn't safe to drink. And finally, there is non-stop noise pollution from all the cars in the city.

B

What are we doing about the pollution in the city?

Mr Gonzalez: The situation is improving. People know that pollution can be dangerous and they are trying to do something about it. For starters, we are improving our public transport network. For example, there is a new train system. And more people use electric cars now, and the police are stopping the old cars that make a lot of pollution. More people use bikes for transport. These "green" programmes are getting great results. Now Mexico City can help cities in China and India to do something about their pollution too.

C

English accents

Almost everybody speaks English in the United Kingdom (the UK), but people don't speak English in the same way. English sounds very different in different parts of the UK.

The way people speak English in a town, city, or region is called an accent. In Scotland, in the north of the UK, people have got a Scottish accent. In Wales, in the west of the UK, people have got a Welsh accent. In Northern Ireland, they have got a Northern Irish accent. In England, of course, people have got an English accent.

But it's not that simple! You can hear different types of accents in each of these countries. Let's look at Scotland, for example. In Glasgow, in the west of Scotland, some people have got a very strong Scottish accent. It's difficult for other English speakers to understand what they're saying. In Edinburgh, in the east of Scotland, people speak in a slow, more careful way. It's quite easy to understand for all English speakers. In England, an accent from London, in the south of England, is very different from an accent from, for example, Liverpool, in the north of England. There are many accents in the UK, and new accents are appearing all the time!

- 1 His accent isn't clear. It's very _____ to understand him.
- 2 My mother is from Wales. She speaks English but with a _____ accent.
- 3 In the east of Scotland, people speak in a slow and careful way, so they're quite _____ to understand.
